

CIS 263: Information Systems Seminar

Students develop their skills in a variety of computing areas, research career options, and develop a project that demonstrates the programming, database, and other skills they have acquired. Students develop a professional level Web portfolio using a variety of computing skills. Prerequisite: Enrolled in or have taken a second-semester programming course and a database course or permission of instructor. One lecture hour per week. 1 credit Spring

Course Student Learning Outcomes

1. Demonstrate their skills in programming, database and a variety of computing areas acquired in the courses they have taken.
2. Develop a professional online portfolio using a variety of tools, techniques and web based skills.
3. Embellish their skills in research, web development and computer software as they complete their project and develop their portfolio.
